MEDICARE

1. Briefing

Medicare is een applet waarmee de gebruiker eenvoudig en snel de dichtsbijzijnde huisarts en apotheek kan vinden. Via GPS of door handmatig de locatie in te geven vind de gebruiker in een paar seconden een mogelijke huisarts of apotheek en eventueel parkinglocaties.

2. Analyse

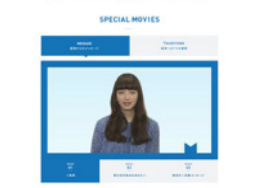

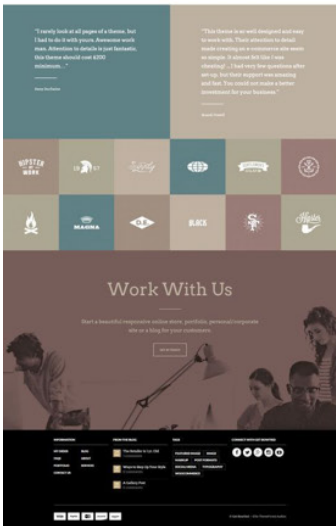

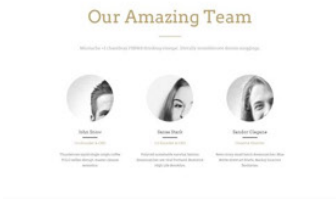

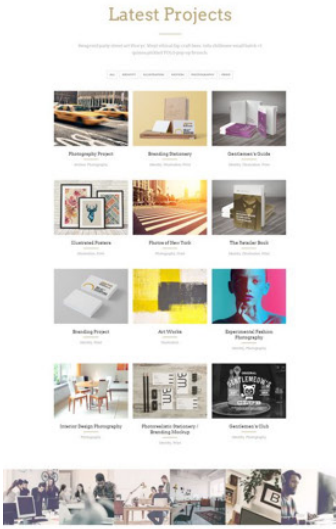

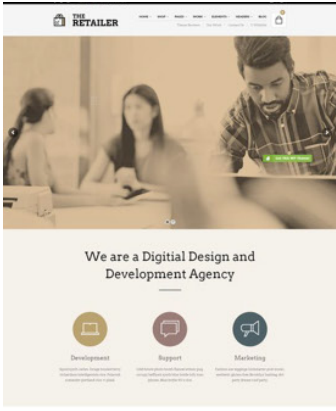

Voor mijn applicatie gebruik ik datasets van de stad Gent. Ik gebruik de datasets “Gezondheid” en “Mobiliteit”. Hieruit gebruik ik vooral:

- Huisartsen
- Apotheken
- Parkinglocaties
